SEMAGLUTIDE

A Weight Loss Option

What is Semaglutide?

Semaglutide is a weight loss option that helps to balance the hormones in your body. It is a glucagon-like peptide that helps the body produce more insulin and stabilize blood sugar levels. While Semaglutide was initially used for patients with Type-2 Diabetes, it has since been FDA approved for weight loss amongst non-diabetic patients.

Weight Loss Consultations

The medical professionals at LC Medical will help to determine whether you are a good candidate for Semaglutide by performing a physical examination and obtaining your family history. For the most effective and safe results, our medical providers prioritize your health first and foremost to determine whether this is the right option for you.

What is LC Medical's recommended supplement plans?

We have options to purchase Semaglutide for 1 month (4 shots), 3 months (12 shots), or 4+ months. For optimal results, we recommend the 4+ months treatment plan.

FAQS

How is it administered?

Semaglutide is administered through a shot on either your stomach or thigh.

Can I administer it myself?

Yes, but for the first session we recommend doing it at our office with a physician.

I don't live in New York, can I still receive Semaglutide from LC Medical?

If you live in New York, New Jersey, or Florida you can receive Semaglutide from LC Medical.

Do I have to pick it up in office every month?

Nope! We will ship to you on the first business day of the month a months worth of supplies.

SURGICAL PROCEDURES

At LC Medical

Oculofacial Plastic Surgery

Dr. Marjorie Rico
Oculofacial Surgeon

Dr. Rico specializes in upper and lower blepharoplasty, submental liposuction, and thread lift procedures.

Upper Blepharoplasty or Upper Eyelid Lift

Surgical procedure that removes excess fat, skin, and tissue from the upper eyelid to alleviate heaviness and correct droopiness.

Lower Blepharoplasty

Surgical procedure that removes excess fat and skin from the under eyes. This is an alternative for patients who do not qualify for tear trough filler.

Surgical Brow Lift

This no-scar, semi-permanent procedure will help to lift the lateral brows to open up the eyes and remove heaviness.

Submental Liposection for Under Chin and Jawline

Minimally invasive procedure targeting the underchin and jawline to decrease the appearance of sagging skin.

Popular Plastic Surgery Procedures

Non-Surgical Rhinoplasty

Cosmetic procedure that uses dermal fillers to temporarily alter the shape of your nose.

Keloid Removal/Scar Revision

Removes excess growth of scar tissue that has formed at the site of cutaneous injury.

Mole, Cyst, Skin Tag Removal

Removes unwanted growth to improve the appearance and texture of your skin.

Surgical Lip Reduction

Removes skin tissue from the upper, lower, or both lips to reduce lip size.

Buccal Fat Removal

Also known as cheek reduction surgery removes buccal fat pads to hollow the cheek area.

Hair Transplant

A solution for male patterned baldness.
