

Face Med-Spa Training

Aesthetic Training & Business Mentorship

Training Courses

At A Glance

Summary

Semi-Private Training courses with the FACE Med-Spa Training are conducted by Dr. Lanna and her staff at the LC Medical offices in Midtown Manhattan. Breakfast is provided with the didactic portion completed in the morning. Hands-on training experience will follow shortly thereafter with lunch will be provided in the office. Trainees will then have a wrap-up conversation after the completion of the hands-on training.

Shadow days with Dr. Lanna and her staff will also be done at the LC Medical offices. Trainees will see a full case load for Dr. Lanna for that day and see aesthetic services performed first hand.

Trainees will be provided with all necessary equipment including cannulas. Trainees will be provided with neurotoxin and dermal filler for each model. Trainees are asked to supply at least 2 models for their training day, but models can be provided, at an extra cost, to trainees if they are unable to source models for that day.

Trainees can take any multimedia and content during the sessions. For an extra cost, Dr. Lanna's team will take and compile content for each trainee, with the aggregate files provided via an online link to download.

Training Courses

Options Depending on Mastery Level

Level 1: Beginner Neurotoxin/Dermal Filler Course

- No pre-requisites. Must be a licensed medical professional in the US
- Focus on patient assessment, anatomy, managing complications and live hands-on models for injections

Mentorship

Business Coaching & Mindset

Summary

Starting a business is easy. Running the business and transforming it into a successful one can be very difficult. The Face Med-Spa Training team can provide business coaching and mentorship for those interested in starting their business or scaling for success.

Business coaching and mentorship are done virtually. Live sessions include monthly interactive podcasts, educational content, and access to the AIS library. Access to injectors and medical professionals for advice will also be available.
