Turnpike Suite C,
Wayne, NJ 07470

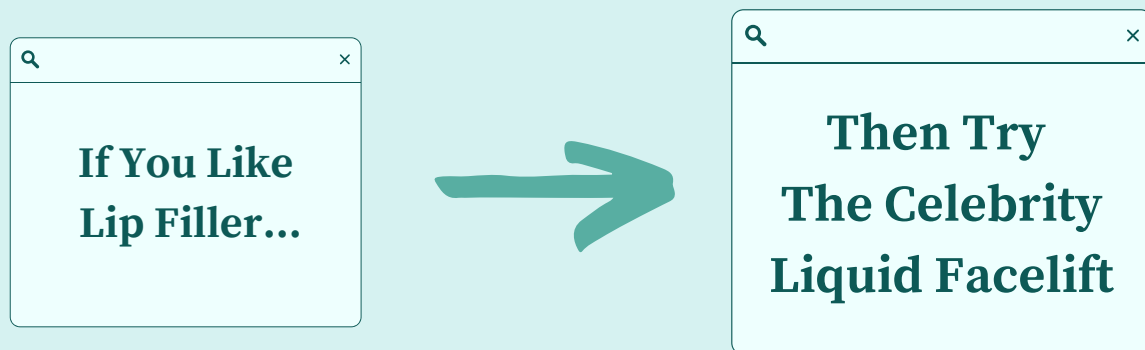

Do You Like This? Then Try That!

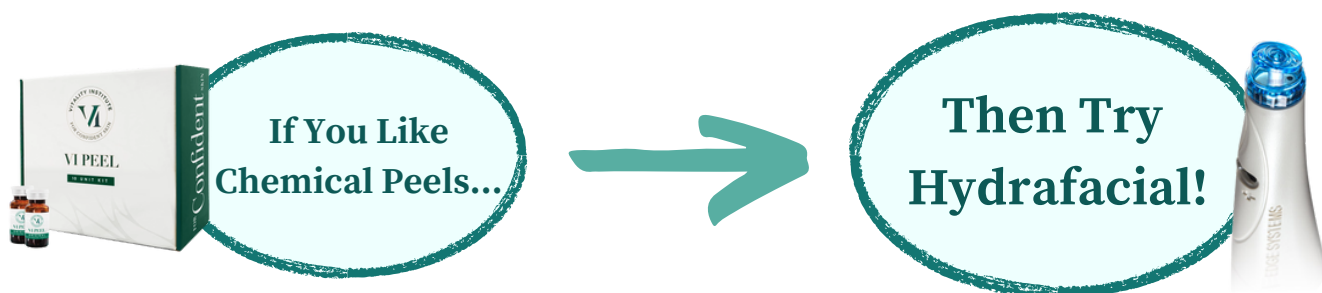

Read LC Medical's recommendations for procedures you might not realize you'll love!

Morpheus8V is another great microneedling technology that uses radiofrequency to boost collagen and tighten the skin! The difference is that this procedure is performed in the vagina as a non-surgical option to rejuvenate your vagina! This **safe, FDA-Approved** procedure has little to no downtime and treats vaginal dryness, vaginal looseness, urinary incontinence, and more.

The Celebrity Liquid Facelift is a great way to bundle together 3-syringes of filler to give yourself an all around rejuvenated look! Along with filling your lips, you can fill your chin, cheeks, under eyes, and temples! We highly recommend The Celebrity Liquid Facelift to provide the perfect balance and facial harmony.

LC Medical is excited to introduce the Hydrafacial! The Hydrafacial is a non-invasive skin care treatment that is personalized to help you achieve your skin goals. The Hydrafacial follows 3 steps: Cleanse, Extract, and Hydrate, to give you beautiful and radiant skin!
