About The  
**Non-Surgical  
BBL**

## What Is Sculptra?

Sculptra gradually stimulates collagen production to deliver natural results. Sculptra works deep within the skin to help restore lost collagen. It is the only FDA-approved biodegradable injectable poly-L-lactic acid (PLLA) collagen biostimulator that works deep in the skin to improve its inner structure to smooth facial wrinkles, such as smile lines.

Valid from Sept. 5th-30th with Senior Injectors

## How does it work?

Sculptra works gradually over a series of 2 to 3 treatments for natural-looking results. Sculptra has long-lasting results for up to 2 years after your last treatment.

**CALL TO BOOK:**  
**(646)422-7385**
